Wharton Airport
882 Robert Vonderau Dr.
Wharton, TX 77488

Location: N 29° 15'.25666 / W 96° 9'.26333

SkyTrails LSA is located at Wharton Airport. And Wharton Airport is located just about 4-miles south of Wharton, TX on Hwy-59; almost exactly between Houston and Victoria.
(about 60-miles southwest of Houston; about 50-miles northeast of Victoria).

From Houston: When coming from Houston, Wharton Airport is about a 40-minute drive, south on Hwy-59, from Sugar Land. Wharton city has three exits, continue south, past all three exits. You will soon see (after ~3-miles) the Chevron Gas Station & "JR's Smokehouse" on the right and "Carroll's Gun shop" on the left. Just about $\frac{1}{4}$ -mile past these businesses on the LEFT are two highway crossover's one right after the other. The second left turn area is for the Wharton Regional Airport. Turn left there and cross the highway just pass the "Wharton Airport" sign (on the left) the street sign will say, "Robert Vonderau Dr".

(skip down to the "Once at the Wharton Airport" section...)

From Victoria: Going northeast on Hwy-59 from Victoria, Wharton is about 11-miles northeast of El Campo, Texas. The "Wharton City Limit" sign on the right of the highway is just a few hundred feet before the right turn into the Wharton Airport. And you will see the airstrip and the Blue Hangars of the airport on your right. These landmarks are your clue to use the right lane on the shoulder to help you get out of the way of highway traffic while you slow down to make the RIGHT turn into the airport.

Once at the Wharton Airport:

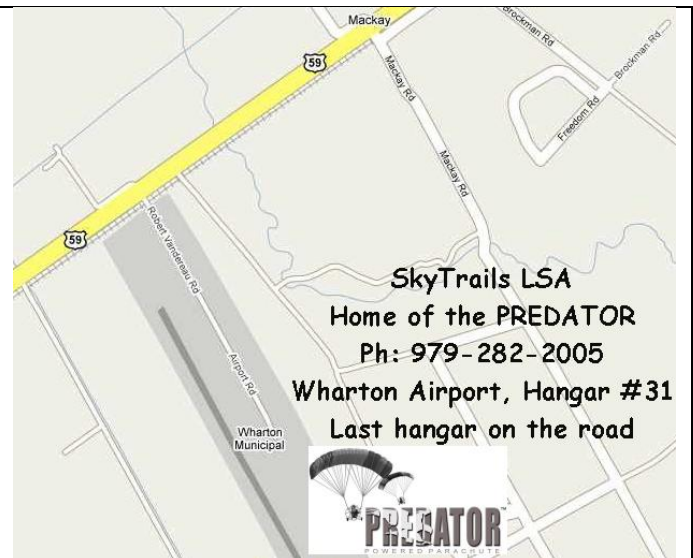

The airport road (on the south side of Hwy-59) turns left just past the new railroad tracks (and the oil well) and immediately turns again, to the right. If you then just follow this southbound road all the way to the end (about ½-mile) to the last grouping of Hangars (#29, 30, 31 & 32). This is the place where **SkyTrails LSA** is flying, training & servicing Powered Parachutes. Our grass flight field is on the back side (the south side) and our office can be accessed via Hangar #31 - again on the south side of the Hangar complex.

WELCOME to our Home - and the manufacturer of the Top-Award winning PREDATOR Powered Parachute!

WELCOME to our 'magic-flying-carpet' world!

The Wharton Airport is just about 4-miles south - past the city of Wharton - on Hwy 59

The PREDATOR Powered Parachutes & SkyTrails LSA are located in the last set (the most south set) of Hangars at the Wharton Airport
